Installation

I have been using ClipMate for, I believe, more than 20 years. Recently, I bought a new laptop that came (maybe sadly) with Windows 11. I cannot get my ClipBar to install properly. I want it to work like it always did in Windows 10. Please help me make that work again. Many thanks.

Windows 11 does not support toolbars in windows explorer, so the ClipBar cannot work. If MIcrosoft brings this feature back, it should work automatically.
